

一、 Cutting Wheel

1: straight cutting wheel

Item No. straight cut-off wheel

Detail description: Cutting of sprues, stainless steel sheet , full-materials, tubes and profiles.

Used for material: Tool steels , high-alloy stainless steels, heat-treated steels, grey cast iron, malleable cast iron , cast steel , ductile graphite iron, manganese cast iron.

Products Series

Note:

- 1、 We can also supply the cutting wheel according with the demands from customer, such as the external diameter size 、 thickness 、 bore diameter 、 hardness and grit of cutting wheel 、 application and so on .
- 2、 Free samples can be supplied for customer checking and confirming.

2: Depressed centre cutting wheel

Item No. Depressed centre cut-off wheel

Detail description: Cutting of sprues, stainless steel sheet , full-materials, tubes and profiles.

Used for material: Tool steels, high-alloy stainless steels, heat-treated steels, grey cast iron, malleable cast iron , cast steel , ductile graphite iron, manganese cast iron.

二、 Grinding Wheel

1、 Depressed Centre Grinding Wheel

Item No. Depressed centre grinding wheel

Detail description: Grinding of sprue, hard welds, build-up welds, cleaning of castings...

Used for material: Tool steels, high-alloy stainless steels, heat-treated steels ,grey cast iron , malleable cast iron , cast steel , ductile graphite iron , manganese cast iron.

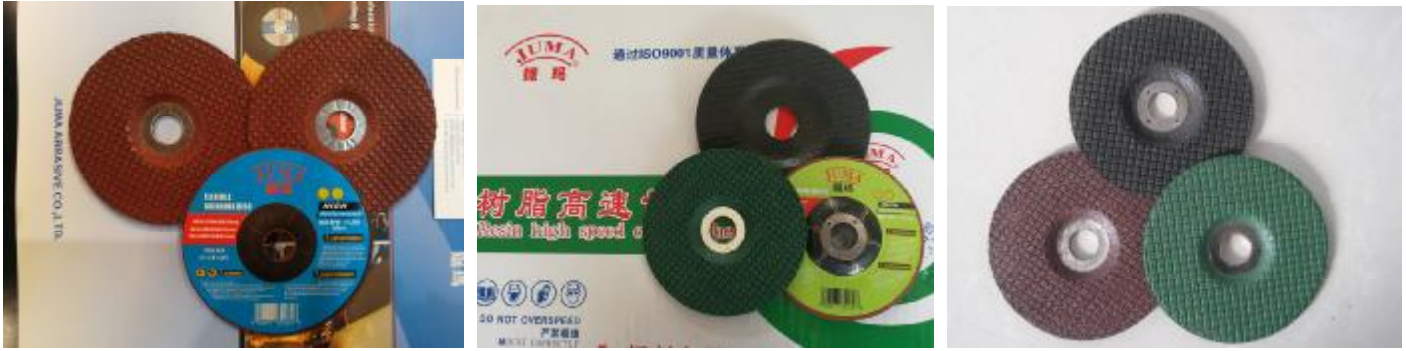

Products Series

Note:

- 1、 We can also supply the grinding wheel according with the demands from customer, such as the external diameter size 、 thickness 、 bore diameter 、 hardness and grit of cutting wheel 、 application and so on .
- 2、 Free samples can be supplied for customer checking and confirming.

3、 Depressed Centre Flexible Grinding Wheel

Item No. Semi-flexible grinding wheel

Detail description : Grinding of sprue, hard welds, build-up welds, cleaning of castings.....

Used for material: Tool steels, high-alloy stainless steels, heat-treated steels ,grey cast iron , malleable cast iron , cast steel , ductile graphite iron , manganese cast iron.

三、 Flap disc

(1)

(2)

(3)

(1) : Aluminium oxide flap disc for metal steel

Item No. Aluminium oxide flap disc

Detail description : Cleaning of welding seams, deburring、 chamfer,de-rust, preparatory works for lacquer of carbodies,machines,switchboards,tank constructions,GFK,sanding of wooden surfaces such as parquet of furniture.

Used for material:

Metal steels, mild steels, tool steels,spring steels, cast iron,non-ferrous metals,plastic,primer,lacquers and wood.....

(2) : flap disc made by calcination gauze for metal steel and stainless steel

web sit: <http://www.juma-abrasives.com>

Email: sale@juma-abrasives.com

Item No. Calcination flap disc

Detail description : Cleaning of welding seams, deburring、 chamfer,de-rust, preparatory works for lacquer of carbodies,machines,switchboards,tank constructions,GFK,sanding of wooden surfaces such as parquet of furniture. This kind of product have the better durable performance and sharp performance than that of aluminium oxide flap disc. It is not only have the same application as aluminium oxide flap disc, but also can be used for stainless steel .

Used for material:

Stainless steel, metal steels, mild steels, tool steels,spring steels, cast iron,non-ferrous metals,plastic,primer,lacquers and wood...

(3) : Zirconium flap disc

Item No. Zirconium flap disc

Detail description : Cleaning of welding seams, deburring、 chamfer,de-rust, preparatory works for lacquer of carbodies,machines,switchboards,tank constructions,GFK,sanding of wooden surfaces such as parquet of furniture. This kind of product have the best durable performance and sharp performance among the three kinds flap disc . It is mainly used for stainless steel .

Used for material:

Stainless steel, metal steels, mild steels, tool steels,spring steels, cast iron,non-ferrous metals,plastic,primer,lacquers and wood...

Flap disc used on machine (as follows)

Machine

T29 Machine

T27 Machine

FD18022	180x22.2		8500	25
.....

Note:

- 1、 We can a supply the flap disc according with the demands from customer, such as the external diameter size 、 bore diameter 、 hardness and grit of it 、 application and so on .
- 2、 Customer should choose the appropriate products according with the application.
- 3、 Free samples can be supplied for customer checking and confirming.
